

### Standardized Display Fields for Templates

When creating and cloning templates, it can be difficult to determine which fields to use and how to find them in the template creator tool. The fields listed below will consistently provide useful data from the Evergreen database's various tables. You can use the Path listed in the second column to find the field in the template creator tool. The Transform and Display Label Changed? columns are suggestions for making the data understandable in the output.

#### Display Fields for Item Lists

Display Field	Path	Transform	Display Label changed ?
Shelving Location	Item > Shelving Location :: Name	Raw Data	Yes
Circ Modifier	Item > Circulation Modifier :: Name	Raw Data	Yes
